Professional Summary

Python Developer focused on Artificial Intelligence and Data Science. Experienced in developing AI-driven OCR pipelines and vision-language models to automate complex text extraction. Proficient in backend architecture and full-stack development using modern frameworks.

Work Experience

Python Developer

Nov 2025 – Present

Sirpi Products and Services

- Developed an AI-driven OCR pipeline to automate and standardize text extraction from diverse document sources.
- Implemented vision-language models and LLMs to improve data extraction accuracy and semantic understanding.
- Architected backend solutions to integrate AI models into production environments for document intelligence.
- Collaborated on architectural design and technical documentation for AI-based document products.

Web Developer Intern

Sep 2022 – Nov 2022

Verzeo

- Built and managed server-side APIs using Node.js and MongoDB to support web application functionality.
- Optimized database schemas and performed CRUD operations to improve system response performance.
- Integrated RESTful APIs and collaborated in agile development sprints to enhance system features.

Technical Projects

Smart Policing System

- Developed an intelligent crime monitoring platform using Python (TensorFlow, OpenCV) for real-time suspect profiling.
- Integrated data collection and predictive analysis workflows to improve law enforcement response times.

Inventory and Supply Chain Management

- Built a Flask-based web platform for pharmaceutical inventory tracking and real-time stock monitoring.
- Utilized analytics to optimize distribution visibility and successfully reduce inventory shortages.

Technical Skills

Programming: Python, SQL, JavaScript, HTML, CSS

AI & Machine Learning: OCR, LLM Integration, Vision-Language Models, TensorFlow, OpenCV

Backend & Tools: Django, Flask, Node.js, MongoDB, AWS, Git, Figma, UiPath (RPA)

Education

B.Tech in Artificial Intelligence and Data Science

2021 – 2025

KGISL Institute of Technology | CGPA: 8.31

HSC / SSLC

2019 – 2021

BVM Global School | Percentage: 90%

Certifications and Awards

- Architecting Solutions on AWS - AWS (Feb 2024)
- Deep Learning and Reinforcement Learning - IBM (Oct 2023)
- Shortlisted for Round 2 in Intel OneAPI Hackathon (Jan 2024)
- Shortlisted for Round 3 in National Tomato Grand Challenge (Nov 2023)
